

PRAKASH CHANDRA SAHOO

Software Developer

7750097143 prakashchandrasahoo8991@gmail.com

SUMMARY

I am a results-driven Software Developer with over 4 years of experience in designing high-performance web applications. My expertise encompasses both front-end and back-end development with a strong foundation in React, Node.js, MongoDB, and AWS. I am passionate about leveraging emerging technologies to streamline processes and enhance digital experiences, and I continuously seek opportunities for learning and improvement

EXPERIENCE

07/2021 -

PresentSoftware Developer

IGLOBAL CONSULATING PVT LTD

A technology company focused on delivering innovative software solutions

- Developed and optimized scalable web applications using React, Node.js, Angular, MongoDB, and AWS, ensuring high performance and reliability
- Designed and implemented robust APIs to streamline data interactions and enhance system efficiency
- Led UI/UX enhancements, improving user experience and interface responsiveness across multiple platforms
- Collaborated with cross-functional teams to drive cloud-based solutions, enabling seamless deployments and system scalability
- Continuously explored and integrated emerging technologies to innovate

EDUCATION

01/2017 - 01/2020

Berhampur, Odisha

Bachelor of Science (B.Sc.)

Khallikote Autonomous College

SKILLS

HTML JavaScript MongoDB React Redis TypeScript Vercel Node.js CSS Angular

PROJECTS

KYP (Know Your Provider)

KYP (Know Your Provider) - A healthcare platform that ensures accurate provider validation, regulatory compliance, and seamless claims submission

- Developed an end-to-end healthcare platform for screening, enrolling, and monitoring medical service providers for claims eligibility
- Leveraged React, Node.js, MongoDB, and AWS for building a seamless backend for the application

Ware_House Management

Ware_House Management - An inventory and order management system to help businesses track stock levels and process orders seamlessly

- Built a full-stack real-time inventory and order management system for retailers
- Implemented AI-driven analytics for demand forecasting and automated order processing

- Leveraged Angular, Node.js, MongoDB, and AWS for building a seamless backend for the application
