

## PRAKASH CHANDRA SAHOO

Software Developer

Mob: 9739143507 | E-mail: pcsahoo8991@gmail.com

### SUMMARY

Results-driven Full Stack Software Developer with 4+ years of experience in building scalable, high-performance web applications using modern JavaScript technologies. Skilled in front-end and back-end development with strong expertise in React.js, Node.js, MongoDB, Express.js, and AWS cloud services.

Experienced in designing responsive user interfaces, developing secure RESTful APIs, optimizing application performance, and deploying cloud-based solutions. Passionate about creating clean, maintainable code and delivering seamless digital experiences through modern development practices.

Strong collaborator with experience working in agile teams, solving complex technical challenges, and continuously learning emerging technologies to improve product quality and development efficiency.

### EXPERIENCE

#### Signovate Technologies — Bangalore

Sep 2021 – Present

- Developed and maintained scalable full-stack web applications using React.js, Node.js, MongoDB, and AWS.
- Designed and implemented secure and efficient REST APIs to improve system integration and data flow performance.
- Optimized application performance, reducing load times and improving responsiveness across web platforms.
- Enhanced UI/UX by building modern, responsive, and user-friendly interfaces using React.js and Tailwind CSS.
- Collaborated with cross-functional teams including QA, DevOps, and business stakeholders to deliver high-quality software solutions.
- Participated in cloud deployment and infrastructure management using AWS services for improved scalability and reliability.
- Worked on debugging, performance tuning, and production issue resolution to ensure application stability.
- Followed agile development methodologies, participated in sprint planning, code reviews, and daily stand-up meetings.

#### Healthcare KYC / KYP Platform

**Tech Stack:** React.js, Node.js, MongoDB, AWS

KYP (Know Your Provider) is a healthcare platform designed for provider verification, regulatory compliance, claims eligibility validation, and healthcare workflow management.

- Developed an end-to-end healthcare platform for screening, onboarding, enrolling, and monitoring healthcare providers for claims processing and eligibility verification.
- Built scalable frontend and backend modules using React.js, Node.js, MongoDB, and AWS to ensure high performance, security, and reliability.
- Designed and optimized RESTful APIs for provider data management, claims workflows, and real-time healthcare operations.
- Implemented secure and compliant healthcare workflows aligned with industry standards and data security practices.

- Collaborated with cross-functional teams to enhance system scalability, operational efficiency, and user experience.

#### **Key Achievements**

- Developed a Health Adjudication System that reduced healthcare claim processing time by 70%.
- Built the KYP Health Portal, reducing report generation time from 3 days to 3 hours through workflow automation and optimized data processing.
- Implemented the Smart Connect 2.0 Dashboard for real-time KPI tracking and monitoring used by 100+ managers.
- Automated Excel-to-JSON data transformation pipelines, significantly reducing manual effort and improving data accuracy.
- Strengthened application security by identifying and resolving vulnerabilities while ensuring compliance with healthcare security standards.

### **Retail Store Management System**

A real-time inventory and order management platform designed to help retail businesses efficiently manage stock levels, warehouse operations, and order processing workflows.

Developed a full-stack inventory and order management system for retailers with real-time stock tracking and order processing capabilities.

Built scalable frontend and backend modules using React.js, Node.js, MongoDB, and AWS for high performance and reliability.

Implemented AI-driven analytics and demand forecasting features to optimize inventory planning and automate order management processes.

Designed responsive dashboards and reporting systems for monitoring inventory, warehouse operations, and business KPIs.

#### **Key Achievements**

Developed a Warehouse Management System that improved inventory accuracy by 80% and streamlined warehouse operations.

Implemented the Smart Connect 2.0 Dashboard for real-time KPI tracking and operational monitoring used by 100+ managers.

Automated Excel-to-JSON data processing pipelines, significantly reducing manual work and improving data handling efficiency.

### **TECHNICAL SKILLS**

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB

Cloud & Tools: AWS S3, RESTful APIs, Git, GitHub

Development Concepts: Full Stack Development, API Integration, Responsive UI Design, CRUD Operations

### **EDUCATION**

#### **Bachelor of Science (Computer Science)**

Khallikote Autonomous College — Berhampur, Odisha

**2017 – 2020**
