

PRAKASH CHANDRA SAHOO

Software Developer | 4+ Years of Experience

9739143507 | pcsahoo8991@gmail.com | Bangalore, Karnataka

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Developer with 4+ years of experience designing, developing, integrating, testing, and deploying scalable web applications using modern JavaScript technologies. Strong hands-on expertise in React.js, JavaScript (ES6+), Node.js, Express.js, MongoDB, Tailwind CSS, RESTful APIs, Git/GitHub, and AWS. Experienced in responsive UI development, backend API development, database-driven applications, cloud deployment, performance optimization, security, production support, and Agile software delivery. Delivered healthcare and retail solutions with measurable improvements in claims processing, reporting turnaround, inventory accuracy, workflow automation, and operational visibility.

CORE COMPETENCIES & TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Responsive UI Design

Backend Development: Node.js, Express.js, RESTful APIs, API Integration, CRUD Operations, Server-side Development

Database: MongoDB, Data Modeling, Querying, Data Processing, Excel-to-JSON Transformation

Cloud & DevOps: AWS, Amazon S3, Cloud Deployment, Application Scalability, Git, GitHub

Application Engineering: Full Stack Development, Performance Optimization, Debugging, Production Support, Security

Architecture & APIs: RESTful API Design, Secure API Integration, Frontend-Backend Integration, Data Flow Optimization

Development Practices: Agile, Sprint Planning, Code Reviews, Cross-functional Collaboration, Maintainable Code

PROJECT EXPERIENCE

Signovate Technologies — Bangalore

Software Developer | Sep 2021 – Present

Responsibilities:

- Develop and maintain scalable full-stack web applications using React.js, Node.js, Express.js, MongoDB, and AWS.
- Design, develop, and integrate secure RESTful APIs for efficient system integration, data exchange, and business workflows.
- Build responsive, user-friendly interfaces using React.js and Tailwind CSS with a focus on usability, performance, and maintainability.
- Optimize application performance by improving frontend responsiveness, backend processing, and data handling workflows.
- Collaborate with QA, DevOps, business stakeholders, and cross-functional engineering teams throughout the software development lifecycle.
- Support AWS-based deployment and cloud infrastructure activities to improve application scalability, reliability, and availability.
- Perform debugging, root-cause analysis, performance tuning, and production issue resolution to maintain application stability.
- Participate in Agile ceremonies including sprint planning, daily stand-ups, code reviews, estimation, and delivery activities.

Healthcare KYC / KYP Platform

- Healthcare platform supporting provider verification, regulatory compliance, claims eligibility validation, onboarding, enrolment, monitoring, and healthcare workflow management.
- Developed end-to-end healthcare modules for screening, onboarding, enrolling, and monitoring healthcare providers for claims processing and eligibility verification.

- Built scalable frontend and backend components using React.js, Node.js, MongoDB, and AWS with emphasis on performance, security, reliability, and maintainability.
- Designed and optimized RESTful APIs for provider data management, claims workflows, eligibility validation, and healthcare operations.
- Implemented secure healthcare workflows aligned with application security and data protection practices.
- Collaborated with cross-functional teams to improve system scalability, operational efficiency, data processing, and user experience.

Key Achievements

- Developed a Health Adjudication System that reduced healthcare claim processing time by 70%.
- Built the KYP Health Portal, reducing report generation time from 3 days to 3 hours through workflow automation and optimized data processing.
- Implemented the Smart Connect 2.0 Dashboard for real-time KPI tracking and monitoring used by 100+ managers.
- Automated Excel-to-JSON data transformation pipelines, reducing manual effort and improving data accuracy.
- Identified and resolved application vulnerabilities while supporting healthcare security and compliance requirements.

Retail Store Management System

- Real-time inventory and order management platform supporting stock tracking, warehouse operations, order processing, dashboards, reporting, and business KPI monitoring.
- Developed full-stack inventory and order management capabilities with real-time stock tracking and order processing workflows.
- Built scalable frontend and backend modules using React.js, Node.js, MongoDB, and AWS for performance and reliability.
- Implemented AI-driven analytics and demand forecasting features to support inventory planning and order management automation.
- Designed responsive dashboards and reporting interfaces for inventory, warehouse operations, and business KPI monitoring.

Key Achievements

- Developed a Warehouse Management System that improved inventory accuracy by 80% and streamlined warehouse operations.
- Implemented the Smart Connect 2.0 Dashboard for real-time KPI tracking and operational monitoring used by 100+ managers.
- Automated Excel-to-JSON data processing pipelines, reducing manual work and improving data handling efficiency.

PHARMACO — Full Stack Developer

Client: APL Analyst IT Solutions Pvt. Ltd.

Domain: Pharma / Clinical Data Analysis

Project Description:

Pharmacokinetic Modelling Program (PKMP) supporting data analysis for pharmacokinetics, clinical pharmacology, biopharmaceutics, and dissolution requirements across drug development, including dose-response and bioequivalence analysis.

Roles & Responsibilities:

- Developed and maintained full-stack web application modules supporting pharmaceutical and clinical data analysis workflows.
- Built responsive and user-friendly frontend components using React.js, JavaScript, HTML5, CSS3, and Tailwind CSS.
- Developed and integrated RESTful APIs using Node.js and Express.js for application data processing and business workflows.
- Implemented CRUD operations and backend services for managing clinical and pharmaceutical data.
- Integrated frontend components with backend APIs to ensure seamless data flow and reliable application functionality.
- Worked with MongoDB and SQL Server for data storage, retrieval, validation, and application-level data processing.
- Implemented form validations, error handling, and business logic to improve application reliability and data accuracy.
- Debugged application issues across frontend and backend layers and performed root-cause analysis for production and functional issues.

- Collaborated with cross-functional teams to understand requirements, develop features, resolve defects, and deliver application enhancements.
- Participated in code reviews, Agile development activities, sprint planning, and continuous improvement initiatives.
- Optimized application performance by improving API responses, data processing, and frontend rendering.
- Supported application deployment and troubleshooting activities in development and production environments.

EDUCATION

Bachelor of Science (BSc.) | Computer Science

Khallikote Autonomous College — Berhampur, Odisha | 2017 – 2020
